Claims 70-72 and 87-95 are subject to the restriction requirement as described below.

Claims 3, 4, 56-69 and 73-86 are not subject to the requirement.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 72, 89 and 90-95, drawn to a method and methods encoded on computer readable media of pricing a travel product, classified in class 705, subclass 5.
- II. Claims 70, 71, 87 and 88, drawn to a computer processing system, classified in class 700, subclass 30.

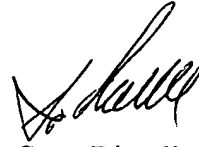

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus can be used to practice materially different processes. The apparatus is a standard computer processing system which is capable of performing standard computer processing functions, such as word processing, arithmetic calculations and computer programming, each of which is materially different from the method claimed in group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
